

Note: I've had an issue with GitHub that I've only noticed right at the end, the whole time I wasn't able to push any commits to my GitHub repository.

So, I've had to create a new repository, but for proof here's that everything wasn't made in just one commit:

The screenshot shows the GitHub interface for a repository named 'BlueGravity-Test'. The current branch is 'main'. The commit history is displayed on the left, with the most recent commit 'create documentation' highlighted in blue. This commit was made by 'aleksapetrovic2907' 15 minutes ago. The diff view on the right shows that the commit added a file named 'Documentation.pdf'. A tooltip indicates that the commit has not been pushed to the remote repository.

Commit Message	Author	Time Ago	Pushed to Remote
create documentation	aleksapetrovic2907	15 minutes ago	Yes
build	aleksapetrovic2907	1 hour ago	Yes
remove unused assets	aleksapetrovic2907	1 hour ago	Yes
scene changes	aleksapetrovic2907	1 hour ago	Yes
add images to project, change environment	aleksapetrovic2907	11 hours ago	Yes
create shop system	aleksapetrovic2907	11 hours ago	Yes
inventory system updates	aleksapetrovic2907	11 hours ago	Yes
create inventory system	aleksapetrovic2907	14 hours ago	Yes
scene changes	aleksapetrovic2907	yesterday	Yes
create tab system	aleksapetrovic2907	yesterday	Yes
update file import settings	aleksapetrovic2907	yesterday	Yes
basic camera controls	aleksapetrovic2907	yesterday	Yes
implement paperdoll system	aleksapetrovic2907	2 days ago	Yes
several tweaks, check description	aleksapetrovic2907	2 days ago	No
Initial commit	aleksapetrovic2907	2 days ago	No

*Thank you,
Aleksa Petrović*
